Reading This Book

If, while reading the following pages of this book, the reader will keep these few facts in mind, a much clearer understanding of the contents will result. The format or style used in this book is known as the **Modified Register System**, which has been refined by the National Genealogical Society.

Three types of numbers are used: one to uniquely identify the individual, one to indicate the generation into which that person falls, and one to denote his or her birth-order within the nuclear family. The identification numbering system used in this book is called **By Descendants, in Sequential Order**. The starting person is 1, his first child is 2, his first child's first child is 3, and so on. After all the descendants of the first child are listed, then the descendants of the second child are listed, and so on until 6 generations. The ID numbers are in sequential order.

When an individual is introduced in his/her separate sketch, the name appears in boldface letters with the surnames in all capital letters. The name is preceded by the identification number. The last given name is followed immediately by a superscript number indicating the number of generations from the starting individual in this book. In parentheses following the name is a list of direct ancestors back to the starting individual. Only the given name is listed, preceded by his/her ID number, and followed by the generation number in superscript.

When the list of children is presented, the plus (+) sign indicates that more about this child will be presented in his/her separate sketch. The ID number is printed, followed by M/F indicating the sex. Next a small roman numeral in front of the name designates birth-order. Next the name is followed by the birth and death dates.

The term "Spouse" may have several different meanings: husband, wife, partner, mate, parent, or significant other. The couple involved may not be legally married. The term "stepchild" may have several different meanings: the child may be a stepchild, adopted child, foster child, or just raised in the home. If there are any other children of the spouse, they will be designated as stepchildren.

The index is arranged alphabetically by surname. Under each surname, the given names are alphabetically arranged. The name is followed by the year of birth and death in square brackets. The number to the right indicates the page where this name appears. The wife appears under her maiden name and under her married names with her maiden name in parentheses.
